

## Punjab & Sind Bank's Internet Banking Website is Secured with Extended Validation SSL Certificate (EV-SSL)

### ⊕ What is Extended Validation SSL?

Extended Validation SSL Certificate gives high-security Web Browsers information to identify a website's organizational identity. For example, if you use Internet Explorer 7 or 8 to visit a website secured with an EV-SSL Certificate, the address bar in Internet Explorer turns green (refer Figure - 1). Firefox 3 and Chrome also support Extended Validation SSL Certificate.

The EV-SSL Certificate ensures:

- Your private information is encrypted before being transmitted on Internet.
- Punjab & Sind Bank is the owner or operator of the website located at [www.psbonline.co.in](http://www.psbonline.co.in)
